The Kanlux LCOB 24V LED strip is a unique lighting solution. It has a very high luminous efficacy and a 3-year warranty, its unique feature is that it shines all the way through - there are no brighter or darker areas on it, no visible points of light. The Kanlux LCOB strip emits uniform light regardless of the depth of the profile and the transparency of the diffuser. The 24V version of the strip allows longer pieces to be used with the connection of a single power supply without any loss of luminescence. Two versions of the strip are available: with IP65 or IP00 protection rating.

- 3 lata gwarancji na warunkach oświadczenia gwarancyjnego, dostępnego na stronie internetowej
