

Kanlux

Kanlux S PLAFON

Kanlux S PLAFON is a modern ceiling lamp that can be controlled using a mobile application by connecting to a Wi-Fi or Bluetooth network. It allows you to adjust the brightness and smoothly change the light color (CCT), offering shades of warm, cold and neutral white. Compatible with Google Assistant and Amazon Alexa, it allows for voice control and setting schedules, so that the light will automatically adjust to your daily rhythm. The ceiling lamp is distinguished by its minimalist design, which will work well in any interior, both classic and modern. It is available in two colors: black and white.
