## KDB

### Tableau de distribution KDB

Les appareils de commutation de la série KDB répondant aux exigences de résistance aux braises à 650°C, peuvent être utilisés seulement sur des surfaces incombustibles (par ex. parois solides et pleines, en matériaux incombustibles). Ils ne peuvent pas être utilisés sur des surfaces inflammables (par ex. plaques de plâtre, bois, etc.), sur des parois dites « creuses » ou sur des gaines électriques.

- Matériau: matériau plastique
