S SENSOR PIR INT 10M

Motion detection sensor for indoor use. By pairing it in the app with selected SMART devices, it will not only turn on the light when motion is detected but it will also trigger any programmed action - depending on the SMART devices paired and the function assigned to them. The sensor is battery powered but it can also be charged via USB. An alarm will let you know when the battery is low. Learn more about Kanlux SMART at www.kanluxsmart.com.
